### **DETAILED ACTION**

This application has been examined. Claims 1,3-9,11-19 are pending.

#### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 05/16/2006 has been entered.

#### ***Priority***

This application claims benefit of US Patent Application Number 09/708898 (11/08/2000) and US Provisional Application 60/164298 (11/08/1999).

The effective filing date for the subject matter defined in the pending claims, as described in the parent and provisional applications, is 11/08/1999. Claims pertaining to new subject matter, as introduced in this application, have an effective filing date of 05/09/2001.

***Information Disclosure Statement***

The information disclosure statement (IDS) submitted on 05/16/2006 is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

***Allowable Subject Matter***

Claims 1,3-9,11-19 are allowed.

The following is an examiner's statement of reasons for allowance:

The provision for controlling multimedia multipoint communication, comprising a plurality of multimedia terminals, a multipoint controller in communication with said plurality of multimedia terminals for call signaling and call control information; and at least one multipoint processor unit in communication with said plurality of multimedia terminals for media information and in communication with said multipoint controller over H.248/Megaco protocol for interfacing the call signaling and the call control information between said multipoint controller and the terminals, wherein the multipoint controller is used to establish and control multipoint mixing of media; and wherein at

least one of said plurality of multimedia terminals is a non-H.323 terminal that does not support H.323 protocol, and wherein the multipoint processor unit is capable of demultiplexing input from said non-H.323 terminal into call signaling and call control information and into media information and transferring the call signal and the call control information to the multipoint controller over H.248/Megaco, wherein all the features previously described are combined in one singular embodiment, is not fairly taught or suggested by the prior art of record.

The Examiner finds particular novelty in the multipoint processor capabilities as described in the Applicant Specification (page 8 Paragraph 2 and page 10, paragraphs 1, paragraphs 4-6) wherein the said multipoint processor is able to process various non-H.323 data streams and relay information to the multipoint controller using H.248/Megaco.

Kumar does not disclose a multipoint processor demultiplexing input from a non-H.323 terminal and transferring the call signal and the call control information to the multipoint controller over H.248/Megaco.

Ng does not disclose a multipoint processor demultiplexing input from a non-H.323 terminal and transferring the call signal and the call control information to the multipoint controller over H.248/Megaco.

Ress does not disclose a multipoint processor demultiplexing input from a non-H.323 terminal and transferring the call signal and the call control information to the multipoint controller over H.248/Megaco.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

**Examiner's Note:** In the case of amending the claimed invention, Applicant is respectfully requested to indicate the portion(s) of the specification which dictate(s) the structure relied on for proper interpretation and also to verify and ascertain the metes and bounds of the claimed invention.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Please refer to the enclosed PTO-892 form.
